

Building Permits

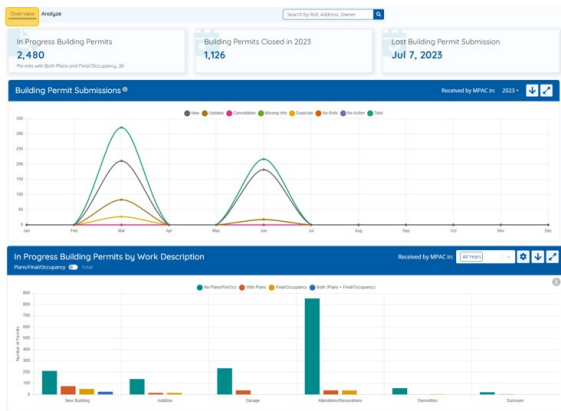

Municipal Connect has a **Building Permit Dashboard** for municipalities to review the building permits that MPAC has received from the municipality.

OVERVIEW TAB presents in-progress permit information by Work Description, Property Series, and Property Type with further breakdown by plans received, final, and occupancy status.

Also includes information on the number of permits closed this year and permit submissions.

ANALYZE TAB provides in-progress permit information at the roll number level organised in tables that align with the overview tab (Work Description, Property Series, Property Type, and Submissions).

Work Description	No Plans/Final/Occ	With Plans	Final/Occ	Both	Total
Alterations/Renovations	853	28	37	0	928
New Building	210	75	50	26	361
Deck	193	5	0	0	198
Addition	138	16	15	0	169

NEW!: Final/Occ Date & Plans fields have been added.

There's More!

- Building Permit information has been embedded in the Property View for a holistic experience when viewing property level information.
- Permits are linked to Events for greater traceability and transparency.
- Building Permit filters are available in My Properties to create custom queries and export results. **NEW!:** Closed date has been added as a filter.
